## Allergen Advice

We take the safety of our customers as highest priority, with this in mind we feel it of paramount importance to let all customers know our position on Allergens from within our kitchen.

If you or anyone receiving our products suffer with an allergy it is of the utmost importance that you/they recognise this statement. This must be shared with anyone receiving our products.

Where the Ribbon Ends kitchen contains all named allergens, these are present at all times. Whilst we take every precaution to prevent cross contamination in our kitchen, we can not guarantee 100% FREE of any specific allergen.

Even though we use a separate area and tins for our free from products, we feel it's important to highlight that our kitchen contains these allergens.

We also acknowledge that there are more allergies than the 14 named allergens, this is why we write a full ingredient list for every product.
